

```
public class App {

    static class A {
        public int a = 1;
    }

    public static void main(String args[]) {
        Integer i = 1;
        int j = 2;
        A a = new A();

        increment(i, j, a);
        System.out.println(i);
        System.out.println(j);
        System.out.println(a.a);
    }

    public static void increment(Integer i, int j, A a) {
        i++;
        j++;
        a.a++;
    }

}
```
